

3 Microfibre Cleaning Cloths

Introduction

Getting the right tools for the job is critical – especially for your car. From start to finish our Armor All® accessories range can get the most out of your car care products and keep your car looking like new.

In addition to having exceptional absorbency, Armor All® Microfibre Cleaning Cloths leave paintwork, chrome and glass streak-free.

So how does Microfibre achieve this? It all comes down to scale, each filament of a microfibre is microscopic in size and when these fibres are woven into a yarn they create millions of fibres in wedge shapes, a structure that due to its capillary action removes microscopic particles of dirt from a surface that would simply be pushed out of the way by conventional cleaning cloths.

Using Armor All® 3 Microfibre Cleaning Cloths - Features & Benefits

Features & Benefits

- Gently lifts away dirt and grime with ease
- Minimises scratching by lifting dirt and particles
- Easy care – machine washable and dryable
- Suitable for automotive and household applications

Directions

1. Use with cleaning product to remove stubborn dirt and stains from surface.
2. Armor All® Microfibre Cleaning Cloth can also be used dry to lift light dust and dirt from hard surfaces such as glass and dashboard.
3. After use, thoroughly wash by hand or machine at a low temperature. Rinse well with clean water and leave to dry before storing.

NOTE: Do not use bleach or fabric softeners. Armor All® Microfibre products will not scratch surfaces, however will pick up particles that can scratch. To prevent this, rinse product with clean water, if there is excess build up of dirt during use to release trapped particles.
87% polyester, 13% polyamide.
