

# BAREBONES

CATALOG 2023

## WE ARE BAREBONES

**OPEN-FIRE COOKING.**

**NATURE-CENTERED DINING.**

**TRANSFORMATIVE COMMUNAL EXPERIENCES.**

Barebones is about what feeds you. Literally. Figuratively. Soulfully. We are about food, nature, and the pull of the fire—and we supply the inspiration, goods, and guidance to help you revel in them. Creating community. Connecting with the moment, each other, and the food on your plate. Forging relationships. Standing in awe. Being transformed. Around the fire, under the stars. Join us in creating something that changes everything.

**SUSTAINABILITY THROUGH PACKAGING**

Barebones is committed to eliminating single-use plastics in our packaging and master packs. This helps to reduce our overall carbon footprint, and aligns with our philosophy of connecting with nature and community.

**Certified**

**Corporation**

Barebones is a purpose-driven organization that leverages products, profits, expertise, and experience to be a force for good. We focus on creating long-term, sustainable solutions within our organization, our local community, and around the world.

## ORIGINS / THE STORY

Barebones has a history steeped in philanthropic work and continues to help lift people out of poverty by providing essential skills, education, and tools.

The first product ever created by the Barebones team was the state-of-the-art emergency shelter, and this continues to be one of the primary assets they provide to underprivileged communities and disaster recovery efforts. With these bare-bone shelters, people in countries across the globe are actively receiving the protection they desperately need.

Barebones has evolved from its philanthropic roots, but continues humanitarian efforts and the “Do Good” philosophy it was founded on.

## GIVING BACK / THE CULTURE

Giving back is a key element of our company culture and at the heart of what we do. Employees are given a week of time each year to volunteer for a non-profit of their choice and volunteer locally at Roots Charter High School in Utah.

Barebones believes in empowering communities to thrive, both locally and internationally, when resources are available. This abundance mindset is their “why” behind the generous donation of time, energy, knowledge, and products for the benefit of communities near and far.

## OUR FOUNDER / THE VISION

*“When you do good from your heart, magic happens, and that goodness comes right back.”*

Robert Workman has spent his career finding ways to give back: from the early days with his first philanthropic endeavor, Tifie, a non-profit that helped marginalized individuals meet basic needs, to Goal Zero, a company that started as a way to provide solar power to groups in the Congo (and now to many around the world).

In recent years, Robert has gone back to his agricultural roots by creating Barebones and the products that help connect people to food, nature, and the primal pull of the fire. He has become more in tune with mother nature and finds joy in helping others do the same.

## SUSTAINABILITY / THE IMPACT

Barebones is a certified **B Corporation**. We meet the highest verified standards of social and environmental performance, transparency, and accountability, and focus on long term solutions that create a positive impact on our employees, our community, and the world.

Our philosophy on sustainability is ever-evolving: we work hard to go above and beyond set goals and metrics to reduce waste and minimize environmental impact. Our latest aim is to remove all single use plastics in our box packaging and master packs.
