

BAREBONES

BAREBONES JAPANESE NATA TOOL W/SHEATH

ref : HMS-2116

816	49,5x2x5	12

Clear bush, strip bark, plank wood, make kindling—all with one thoughtfully-crafted tool. Inspired by a traditional Japanese implement and constructed with heritage-quality materials, our Japanese Nata Tool unites versatile function and refined durability. The stainless steel blade and a solid steel core that extends through the length of the hardwood handle lend stability and greater swinging weight yet it still packs thin and light, making it an essential addition to any collection.
